Capture breeding, habitat restoration, and long-term holders for conservation purposes are all part of the Coalition for the Conservation of Tropical Rainforests. The Coalition is a group of organizations that are working together to protect the rainforest canopy of Central and South America. The rainforest canopy is home to some of the most unique and beautiful animals on Earth, including the golden lion tamarin. The Coalition’s goal is to help protect and preserve the rainforest canopy and its inhabitants for future generations.

One of the more unique ways to get involved with your Santa Ana Zoo and help be a leader in the education of children about endangered species is to participate in breeding and conservation programs. At the Zoo, we continue to move forward with the opportunity and need arise to further understand how the cat makes its connection between these marvelous creatures and the Zoo visitor. After all, the animals can be an excellent way to educate our young visitors as well as our older ones on the importance of conservation.

In the following section, you will learn about the Santa Ana Zoo’s “vision.” You can send your donation toward the purchase of a sponsorship toward your favorite animal. Your sponsorship purchase will help to educate children about the value and appreciation for each animal.

Adaptable to any grade level, these programs fit in perfectly with the educational programs or the older students. Our Zoomobile presentations are free with Zoo admission. If you have a specific date and time in mind for your visit, please call our Education Department at (714) 647-6562 for more information. As always, we welcome feedback, comments, or suggestions.

KIDS ZONE
Zoo Fable #26: The Council of the Mice

UNLOCKED (The assembly of the Mice)

1. SMART (Many of these were discussed in previous articles).
2. NIGH laughter (I had a baby cat with this name). With this name, I was always thinking of what it would sound like when a king went to lay the bell on the cat! And my baby man didn’t sound much like a king! The name, I felt, was a good one for a baby cat, or for a cat that was going to become a king!

Our Santa Ana Zoo and Friends of the Santa Ana Zoo are proud to present... Winter’s Heart, the latest feline member of our family! Winter’s Heart is a beautiful example of why the Santa Ana Zoo is such a special place for all who visit it.

On a given day, the noise generated at our facility was more than enough to fill the most die-hard of believers in the reality of other beings. But for some reason, we just couldn’t shake the feeling that there was something different about this place. We couldn’t quite put our finger on it, but we knew it was there. And it was there, just as much as the rest of us, for as long as we can remember.

The Zoo is a place where children can learn about the value and appreciation for each animal.

One of the more unique ways to get involved with your Santa Ana Zoo and have a lasting legacy of showing your support and dedication to the animals of the Zoo is to become a part of one of our many sponsorship programs. The Zoo features 30 hand-painted animals, a nature center, and a playground. Many of the figures represent residents in the Zoo and endangered species. The figures are for sale and can be found in our Gift Shop.
